

# O2 Portable

Portable O2 Monitor

## What?

The O2 Portable is an oxygen monitor supplied with different sampling adaptors allowing it to be used for cylinder verification by divers as well as being an on-line monitor to be used by filling stations and scuba schools.

## Why?

Checking the oxygen levels within scuba tanks allows for a safely planned dive. As a dive shop, you need to be able to certify the mix you provide and as a scuba diver you need to have confidence in your tanks gas mix.

## Where?

The O2 Portable is lightweight and rugged so can accompany divers all around the world. As it is also supplied with different sampling adaptors it can also be used as an on-line monitor too in gas distribution panels, diving chambers and compressors.

# O2 Portable

Portable O2 Monitor

## Key features

- Fast accurate analysis of oxygen
- High performance equipment at an affordable price
- Quick and easy to use
- Market leader for oxygen analysers
- 3 year graded warranty
- Robust design

## Specifications:

### Range:

0.1 to 100% in O2

### Accuracy:

±1% of reading over range 0 to 50% when calibrated on air in accordance with the manual ±2% of reading over range 0 to 100% when calibrated on certified pure oxygen in accordance with the manual.

### Sensor warranty:

3 years (graded)

### Sensor response:

<15 secs to T90

### Power:

9V Alkaline (PP3)

### Operating temp:

-5°C to 50°C

### Dimensions:

#### Length:

98mm

#### Depth:

36mm

#### Width:

64 mm

#### Weight:

200g

### Sensor response:

90% in less than 15 secs
